

Aerial Lift Training Glendale

Aerial Lift Training Glendale - An aerial work platform is a mechanized access platform. This machine provides access to otherwise not accessible areas for people or equipment. Likewise known as an elevating work platform or aerial device, the machinery is usually used to be able to access high areas. Construction and maintenance employees normally should make use of aerial work platforms on the job. They are utilized by firefighters for emergency access.

Intended for temporary use, aerial work platforms are different from elevators, that provide permanent access to high areas. An aerial work platform is intended to be operated by a single individual, and could lift weights of less than one ton. Some types have higher load limits. There are a variety of kinds of aerial work platforms; for instance, there is a "scissor lift" and a "cherry picker".

Several aerial work platforms are available equipped with compressed air connectors for power tools or electrical outlets. For specialist tasks, like for instance lifting frames for window glass, an aerial work platform may come with special equipment.

People who want to operate an aerial lift machine should go through training. Normally, the members of a Health & Safety Committee and their representatives are responsible for the inspection of every machine and work areas and are also required to go through training. Trainees would learn how to utilize an aerial lift machinery. They would also gain an understanding of the rules that apply to the safe use of these machines. Regulations differ within different provinces, and in federally regulated worksites.

Anybody who is required to work near or lifted by an aerial lifting machinery needs to be informed concerning possible dangers. In a general safety session, an Aerial Lift Training Video can be shown so as to educate all of the employees who work near them or are lifted by them.

Aerial Lift Training Program consists of modules focused on the following: Hazard Identification; Aerial Lift Devices and Operating Controls; Pre Operational Checks for Aerial Lift Devices; and Platform Positioning & Park Positioning. The particular program is meant to train employees on the safe use of self-propelled, boom supported elevated work platform and self-propelled, elevated work platform. A certificate will be provided to workers who complete the program, signed by a person qualified to be able to verify the successful completion of a hands-on practical evaluation.
